Aceh, Indonesia

With a strong foundation in Computer Engineering, I have actively developed my expertise through various roles, from Laboratory Assistant, Mobile and Web Application Developer, IT Support, Graphic Designer, to a Contributor in the Web3 ecosystem. This experience has equipped me with a broad range of technical skills, from application development, hardware, software, and IoT, to a deep understanding of blockchain technology. I am motivated to continuously learn and am ready to bring new energy and perspectives to a future team.

PROFESSIONAL & WORK EXPERIENCE

IT & Media Staff

Jan 2026 - Apr 2026

Partai Perjuangan Aceh - Full Time

- Enhanced brand awareness and public reputation through the planning and production of creative digital content for all social media platforms and local TV.
- Developed and managed the party's official website as a responsive primary information hub, ensuring optimal information accessibility for the public and supporters.
- Designed and implemented internal management systems for managing the database, digital decree (SK) archives, news portal systems, and various other internal management tools to improve administrative and operational efficiency.
- Provided regular strategic recommendations and IT solutions to optimize digital campaigns, reputation growth strategies, and the party's operational infrastructure.

IT & Graphic Design Support

Aug 2025 - Sep 2025

Hermes Palace Hotel, Banda Aceh - Internship

- Provided technical support and acted as an operator during key hotel events.
- Developed visual materials (graphic designs and videos) to enhance marketing and promotional efforts across various platforms.
- Collaborated with the marketing team to produce digital content for various internal and external hotel campaigns.

Digital Asset Strategist

Nov 2023 - Jul 2025

Remote - Independent

- Analyzed and identified digital asset opportunities within various GameFi Web3 ecosystems.
- Managed a portfolio of digital assets (NFTs and tokens) to optimize return on investment (ROI) through farming and staking strategies.
- Conducted in-depth research on tokenomics and risk management to make strategic decisions for hedging asset value against market volatility.

Mobile & Web App Developer

Jan 2023 - Jul 2025

Remote - Independent

- Developed several mobile applications for clients, specializing in educational games (Tari Saman & Indonesia's History in Dice) and an Augmented Reality game (Electro in AR).
- Designed and developed automation bots to simplify repetitive workflows, successfully increasing efficiency and reducing manual task completion time for clients.
- Developed scalable Web Applications with custom functionalities tailored to client needs.

Graphic Designer

Okt 2022 - Jul 2025

Remote - Independent

- Designed and produced a variety of visual materials for clients, including brand identities (logos & brand guidelines), promotional materials (posters & brochures), and digital content for social media.
- Collaborated directly with clients to translate their vision and needs into effective and visually compelling design concepts.
- Independently managed the entire design project lifecycle, from initial briefing and concept development to revision stages and final asset delivery for clients.

Mobile Developer & Manager Assistant

Des 2022 - Feb 2023

Telkom Indonesia, Banda Aceh - Internship

- Designed and developed a mobile application to optimize the process of monitoring and supervising field technician performance by managers.
- Facilitated communication flow between managers and all field technicians, ensuring the efficient delivery of technical issues and work instructions.

Computer Engineer Programming Lab Assistant

Des 2022 - Feb 2023

Syiah Kuala University - Part Time

- Guided and mentored 60 lab students in learning the fundamental concepts and practical applications of Python Programming.
- Actively contributed to improving material comprehension, which resulted in a final grade increase for over 95% of the students.

Microdential Artificial Intelligent Assistant

Okt 2021 - Des 2021

Kampus Merdeka - Contract

- Served as the primary mentor for 30 participants, guiding them through an intensive curriculum covering Python, Artificial Intelligence, and Data Visualization.
- Coordinated all learning logistics, ensuring smooth virtual sessions, material distribution, and efficient task collection.
- Regularly evaluated participant performance and understanding, ensuring that over 90% of tasks and projects were completed to the required standards.

EDUCATION

Bachelor of Computer Engineer, GPA 3.41

2019 - 2026

Syiah Kuala University

Thesis : "A Comparative Security Analysis of Web2 and Web3 Using the Penetration Testing Execution Standard (PTES) Method".

TRAINING & CERTIFICATION

Web Development with Node.Js and React

Aug 2025 - Sep 2025

BPVP Banda Aceh

- Completed a project-based intensive training program covering back-end development with Node.Js and front-end development with React.
- Passed competency tests in various units, including User Interface (UI) implementation, structured & object-oriented programming, library usage, and version control system (Git) application.

Cloud Computing Learning Path

Feb 2022 - Jul 2022

Bangkit Academy by Google, GoTo, dan Traveloka

- Completed a 6-month intensive study program focused on the architecture, deployment, monitoring, and management of enterprise solutions on the Google Cloud Platform (GCP).
- Mastered a strong technical foundation, including basic Web, API, & Back-end development, as well as cloud architecture with Google Compute Engine.

SKILLS
